

Posted Monday 16th May 2011: [FINAL POST OF INFORMATION]

Dear clients end of event (good from my point of view), there are some minor physical processes still affecting some clients, please call if you have issues, if you are not sure.

If you happen to be standing on the beach looking out across the bay as the sun set, you may see a red "glow" very subtle across the water.

I will not post further info, and this present info will only stay on the site for a week.

Posted Thursday 12th May 2011:

Dear Clients still no end to the energy event and odd symptoms; liver down or pressure on the chest. These symptoms are lighter but still can make one feel not quite right. Treat symptoms were possible or contact me.

Posted Wednesday 4th May 2011;

Dear clients the energy event has not completed as yet. Basic symptoms of heaviness in chest holding mucosa, causing a barking cough and lower insulin due pancreas being affected so one could feel quite sluggish....akin to a cold or flu type of feeling. So treat symptoms were possible or contact me.

Posted Friday 29th April 2011:

Clients a shift of energy at 3:40am this morning relaxed the kundilini pressure, releasing T7 to L2 and diaphragm's. Breathing will improve + brain function + nervous system + digestion + elimination. There is a light pressure from the energy shift that I am still waiting to happen. Rescue remedy is a good helper.

Posted Wednesday 27th April 2011:

Dear Clients still waiting for the fourth event to complete. Symptoms as below, you may find the Pia mater stresses after sunset til about 10 pm.

Posted Wednesday 20th April 2011:

Clients I am still waiting for this fourth energy event, so you may still be experiencing symptoms:

- the kundilini is affecting people out to 300 km away from the strip of the energy event, so a lot of people may be experiencing the middle/lower back sharp pain.
- the nervous system is being pressured and reduced. Symptoms can be many and varied - high adrenaline, low digestive process, heart fiberation, odd pains with liver or stomach.

- the Pia mater is still being pressured so a deep headache may be experienced, pharmaceuticals seem to reduce sharpness of headache.

Overall subtle symptoms that do not seem to add to much but make's one feel odd, if you are sensitive you may experience more server pain, heavy feeling due low bone function and express anxiety.

Posted Sunday 17th April 2011:

Clients, if you are wondering why you may still be having breathing and headache issues. The "best laid plans of mice and men" after all I am a mere male and learning! There have been 3 energy events, one leading up to Friday; eating food seemed the only thing to do, with headaches. The second energy event on Friday at about 4:10pm and the third energy event last night Sat 16th around 9:59 pm. My head went through the roof with a deep headache leading up to 10pm and my hands pained me.

There will be two other energy events the fourth starting late tonight Sund 17th leading into Monday 18th avo. The fifth and well!!!!...final energy event in the 36 hours after the Monday event.

The environmental energy pressure on our kundilini, causing pressure on the spine, subluxing to a certain degree so the associated nerve issues and lower back discomfort.

The causation is the mother earth reconnection to the Universal Consciousness. Clients may still experience disorientation and headaches due Pia mater (membrane around the brain) tightening up with the energy event, and low nervous system, creating an imbalance of hormones driving the cardiovascular system; associated reduced breathing and possible sore hands associated with low blood circulation. If you get sick of the rising energy causing you discomfort, move away outside the area I have talked about. You will feel a change when you get outside the affected area.

Some clients have tried pharmaceuticals and they have had some success to reduce the severity of the discomfort.

Posted: Thursday 14 April 2011:

Clients reporting a tightening in chest. (This tightness is the bag around the heart over functioning, reacting to the Heart charka reaction to the energy build up..)

This pressure on the heart charka will also cause breathing difficulty.

Hands may loose strength and be painful, due loss of oxygen in blood, low breath and low blood circulation, like being at high altitude.

An overall feeling of being stressed. But not mental stress a body stress.

IF YOU (GO SLEEP) MOVE OUT PAST THE LINE I HAVE DESCRIBED ALL THESE SYMTOMS WILL ABAITE.

Posted Wednesday 13 April 2011:

Clients in the area are starting to feel clamping in there head and tightening of the chest.

Posted: Tuesday 12 April 2011

Dear Clients, friends + others,

on Friday 15th April there will be an energy event. An energy spike will occur between 2pm to 3pm and last 8 minutes. The area covered by the spike is a line running south from a place just south of Kyton - south through Melbourne - south through the peninsula headland - south to midway into Bass Strait.

The eastern part of the bay will be affected. My concerns are that previous events have resulted in clients in the area getting an instant headache and the after affect was a sick client for up to a week.

THIS IS NOT THE EARTHQUAKE STUFF.....

This event is stronger and larger than any I have known, so my concern is that a lot more clients - friends - others of mine live and work in the area that will be affected by the energy spike. If you are attuned and sensitive (my clients - others) will get perhaps... a more severe headache...an instant migraine lasting perhaps days...and very sick for a lot longer.

If it hit while you were driving a car you could cause an accident.

My phone will go burko and I will not be able to help you all affected. If it is a strong affect I will endeavor doing a general correction.

So I am asking you to plan the day on Friday avo; be away from the eastern part of the bay by more than 6 km. If you are east of locations a north - south line from Blackburn to Craneburne to Redhill. Go and have lunch away from the area, take a train ride to Blackburn - Clayton - Craneburne for a different shopping spree.

YOU CAN RETURN AFTER 3PM.

What symptoms you may expect.

- a green glow over the bay starting Wednesday and deepening Thursday to Friday. The moon will appear greenish. This is the magnetic field build up, ionizing of the air, like the lights in the arctic or antarctic circles .

- a lot of fish will leave the bay from Thursday avo.

- Friday 10 am you may feel a tightening in your chest and it will get stronger, until the energy spike between 2pm to 3pm.

- animals will be stressed and want to be free from a time around sunrise on Friday.

IF THESE SYMTOMS DO NOT OCCUR AND IT ONLY ENDS UP TO BE A
...."BURB..."....I CAN LIVE WITH THAT.... I WILL BE A VERY HAPPY
PRACTITIONER TO KNOW CLIENTS ARE OK.

Please think about your Friday...shift things around...please try.

If nothing happens as I said I would be happy, knowing my clients are ok.
