

ENERGY INFORMATION

Greetings from Glenn – November 2004.

At the moment there is very high frequency energy – evolutionary energy referred to as the Photon Belt or Golden Nebula intersecting our galaxy and affecting the Earth environment.

These energy's affect living matter and these affects though evolutionary can have severe physical affect on living matter until the living matter adjusts to this energy.

This high level of energy is in the form of waves these waves have been pulsing through our region of the galaxy from the 1930's the most recent strong group of waves extended from December 2003 and will continue til 16th December 2004.

The symptoms that people may feel due to the influence of this energy could be:

1. Fluctuating Scoliosis - hip rotation through a 12 hour period,
2. Fluctuating protectors fields; that for example a person may show intolerance for example of wheat for perhaps 2 to 3 hours through the day due to the substance field being interfered with; stopping it from functioning correctly and the person may bloating.
3. Fluctuating cranial plate misalignment, causing behavioural problems.
4. Shoulder muscles/ligaments/tendons/nerve structures turning off these systems making the limbs immobile.

I have established that when the Mother Earth Consciousness has stored enough of this high frequency energy, the Mother Earth Consciousness will be able to evolve.

This evolution of the energy state of the Mother Earth Consciousness will cause an energy flux to be projected from the earth out past the atmosphere of the earth, and will block the high frequency (photon belt energy) energy entering our earth system. If viewed from outer space the earth would look like a golden psychic sphere.

I have established that living (human – animal- etc) energy fields are going to alter over the next 26 months. Why because the Mother Earth Consciousness is projecting nurturing energy out past our atmosphere and this will protect living matter on the earth.

This will cause the human survival mechanism for example in our bodies to no longer maintain protector fields as they exist now so the fields will change.
