

# **ENERGY INFORMATION**

**Greetings From Glenn October 23rd 2006**

The consistent Photon Energy has been pressuring many people to release deep seated issues and has driven many relationships to “the wall”. Hopefully people will have patience with each other long enough to get through this time of change and be able to maintain and find the reward of their partnership.

The Earth consciousness is maintaining its change, what we would call a toxic release and it is reaching a peak we see it in many things extremes of weather, extreme racial tension, etc; and it is expected to continue for two more years.

The Elementals energy beings that work with the Mother Earth to maintain stability with her surface energy, are beginning to be born into more normal cycles and are expected to reach near normal numbers over the next 5 years.

**LIFE IS MORE BEAUTIFUL EVERY DAY!**
