

# ENERGY INFORMATION

**Greetings from Glenn – February 15<sup>th</sup> 2005**

The Mother Earth Consciousness is re-birthing (closest word to describe the evolutionary phase) and affecting some 90 % of women (some 4,6 million women are solely dedicated to the project to help mother earth consciousness) and a small percentage of men.

These people are connecting to the Earth as nurturers to help the Earth Consciousness through this phase, these people inadvertently connect to the Earth at a spiritual level and lose connection to the Universe (like using the Earth as you would a spirit guide) this misplaced connection can cause scoliosis in people and anxiety.

The energy change in the Earth is a strong nurturing energy and is emanating from the Earth out into space nearly to the Moon.

All living matter is being protected (indicating a possible change to the Protector Field system), the full influence will be completed in the coming 25 months.

This nurturing energy has a reducing impact from the very strong photon energy on living beings, but we still need to evolve and the photon energy will allow this to happen, and so it is not being totally blocked but is starting to harmonise with the earth energy.

We all need to evolve.

As was expected, last week (start of February) the photon energy wave established itself and will be affecting us til the second week in October 2005.

The wave influence will be longer in this phase as we approach the photon source until we are eventually are totally enveloped in the energy.

Last year the affect from the photon wave was duration of 5 months, the year before it was 2 1/2 months duration.

Its an interesting time to be involved as an energy being, have patience there may be some odd things occurring.

It is very important to understand the benefit to living beings this time of change means, and with this knowledge we can have patience with change.
