

ENERGY INFORMATION

Greetings from Glenn – February 18th 2005

I have found two very interesting and important aspects of the energy change as the energy flowing from the Earth and the photon energy flowing down through this part of the galaxy occurs.

1. As these two energy systems inter-link they are allowing humans to release long term issues simply and easily.
2. The meshing of these two energies has created a situation for a small number of people. It has put a barrier between them and the Universal energy. In other words they are no longer getting natural energy and they slowly loose energy. The person looks good, but they are lethargic and cannot take nutrient in.
3. Be aware that a lot of embedded energy is being pushed out of the Earth. Energy embedded by past races and now the Earth is not tolerating this and so is pushing these energies out of itself. This is a form of toxic/emotional release by the Earth and in sympathy many people are having emotional/toxic releases. These energies can affect people physically.
