

ENERGY INFORMATION

Greetings from Glenn – April 10th 2005.

The Earth consciousness has reached a time of stability for the next month.

The emotional response to evolutionary change caused physical change in the earth as per the tsunami wave and quake in Indonesia.

This area of the earth represents similar to the liver in a human and is the processing of change.

At present the Earth consciousness is convalescing.

The journey of evolution of all living things continues for the Earth consciousness and humans.
