

ENERGY INFORMATION

Greetings from Glenn – May 26th 2005

The Earth Consciousness has been quite serene and the tranquillity is a blessing to us all.

The females in our society are able to rekindle their own persona and re-connect with family. Though the present issue for them is the knowledge they have gained from the connection to the Earth Consciousness, this has given them an aura of "difference". People, who know them feel the "difference" and wonder if they know them anymore, this can cause relationships to be strained because the person they thought they knew is not that same person.

The most significant aspect of the Earth evolution is that there appears to be a Daughter consciousness with the Mother consciousness and a sense of very fast development occurring and change in the next two years. The "Re-birthing" at the beginning of the year was in reality a birthing.

WELCOME DAUGHTER COMSCIOUSNESS.

At this time as the psychic energy is reducing (negative energy) on the earth plane due to the Photon belt and positive Earth energy, other energies that were never as obvious are starting to become evident. Elementals (energy beings that work alongside the Mother Consciousness that help repair revitalise the earth energy) are starting to become apparent. Air Elementals some 450 of these beings are moving around the earth releasing stored emotion. These beings are large energy masses one identified yesterday (Wednesday 24/5/05) is 90 x 12 kms in size this gives one a great sense of happiness to know we are being looked after by the Universe in many beautiful ways by these huge gentle giants.
