

ENERGY INFORMATION

Greetings from Glenn 26th June 2005.

The Earth environment is being enhanced by the planetary energy change, as each of the planets evolves their individual energies will have some affect on living things.

The Mother Earth consciousness and Daughter consciousness are emanating a great love for each other this "*feeling*" is felt as a very strong family bond. This "*feeling*" is being felt by many young people (ages 4 to 15 years), this causes a sense of loss in themselves in relation to their own family bond. That is they feel this great powerful love emanating from the Mother Earth consciousness to her Daughter consciousness and they do not feel this same powerful love from their own family. This confuses them and creates a sense of not being wanted and then this strong rejection can cause dislocation of family emotions. This is affecting some 70% of children. Some of the effects of these family emotions on people is the reduction in the function of the facia around the right lung, (the facia function is to aide in pumping fluid out of the lungs and drawing air into and out of the lungs when working correctly); but this function reduces to around 20% causing the affect of a pleurisy on the right lung, a very deep barking cough is also associated with the problem.

At the same time and since 8th April 2005, the Sun's radiance energy has increased its frequency two fold higher. This higher frequency is affecting the kundilini and spine of some 60% of humans. This can cause a scoliosis that can hinder the workings of organs. E.g. a number of people when being affected by the 'Mother Earth consciousness and Daughter consciousness emanation of great love "*feeling*"... creates a mood of rejection pressuring the right lung. Add the scoliosis due to the Sun's increased frequency that can affect the bronchi and lungs to function at a lower level. So people seem to have a severe flu that does not seem to have a cure and stays longer than is normal.

The above affects will hinder some people for a further two months till the people relax and adjust to the phenomena.
