

ENERGY INFORMATION

Greetings from Glenn – July 12th 2005

The Earth energy has increased in frequency and is now very high since the 3rd of July 2005, all the other planets in our solar system, their energies are also rising in frequency. The next planet to raise its frequency will be Saturn in about 3 days and so on til all the planets in the solar system are vibrating at the higher frequency.

The planets are singing!

Singing started at the beginning of April 2005 and it will continue for at least 4 years.

The increase in frequency is affecting certain people and it is causing their meridian structure in their body's to vibrate in an imbalanced way, causing scoliosis and perhaps other minor problems. The body will balance in a short time as it adjusts to the frequency.
