

ENERGY INFORMATION

Greetings from Glenn 19th October 2005.

The Mother earth Consciousness has come through a stage of needing support from her fellow planets Mars and Mercury, the phase occurred between April through to late September.

This phase had a strong affect on females in the human race causing a pressure on them to demand support from their partners, the pressure on woman to do this was up to 6 to 10 fold more than what a woman would expect, the male not understanding this need, felt helpless and unable to cater to this need and so a lot of relationships have been strained to the degree of separation.

This phase now completed the females are starting to settle and have peace but the males are still in a void of desperation wanting there female partner back to what they perceive normal and this expectation will slow over the next month til the relationship settles back to a basic human nature.

In a week the Photon energy wave will have passed us and we will be in a quiet time. The next energy wave will engulf us late December and be with us longer perhaps until late November 2006. By this time the majority of the humans that are to move into the next millennium will have shifted their structure to the crystalline form allowing us to survive the high frequency energy of the Gas nebula (Photon Belt).
