List Of Toxic Materials (Including BSE?) In Vaccines Toxic Materials Put Into The Body With Vaccines

From Patricia Doyle, PhD
dr_p_doyle@hotmail.com
12-14-2

Hello Jeff - Many vaccines containing live virus, such as the smallpox vaccine, use bovine sera or other animal sera.

Patty

Note - READ the vaccine ingredients list below carefully. Do you want these items injected into your and your children's bodies? Among these many toxic and/or contaminated ingredients is the now infamous Thimerosal (MERCURY). Also, casein and gelatin are bovine products. And how about those 'washed sheep red blood cells' in DPT...sheep have had 'mad sheep' disease (scrapie) for many decades. Do you feel lucky? - Jeff

Polio - DPT contains:

DPT - Diphtheria and Tetanus Toxoids and Pertussis Vaccine Adsorbed
SmithKline Beecham Pharmaceuticals 800-366-8900 x5231

Produced using aluminum phosphate, formaldehyde, ammonium sulfate, washed sheep red blood cells, glycerol, sodium chloride, thimerosal
medium: porcine (PIG) pancreatic hydrolysate of casein.

Here is a more thorough list. Note the anthrax vaccine and its contents, including bovine material. Now wonder the vets got Gulf War Syndrome.

Acel-Immune
DTaP
Diphtheria and Tetanus Toxoids Acellular Pertussis Vaccine adsorbed
Lederle Laboratories 800-934-5556

Produced using formaldehyde, thimerosal, aluminum hydroxide, aluminum phosphate, polysorbate 80, gelatin.

Act HIB
Haemophilus Influenzae Type B (HIB) Tetanus Toxoid Conjugate
Connaught Laboratories 800-822-2463

Produced using ammonium sulfate, formalin, sucrose, thimerosal
Medium: semi-synthetic.

Attenuvax
Measles Virus Vaccine Live
Merck & Co, Inc. 800-672-6372

Produced using neomycin, sorbitol, hydrolyzed gelatin
Medium: chick embryo.

DPT
Diphtheria and Tetanus Toxoids and Pertussis Vaccine Adsorbed
SmithKline Beecham Pharmaceuticals 800-366-8900 x5231

Produced using aluminum phosphate, formaldehyde, ammonium sulfate,
washed sheep red blood cells, glycerol, sodium chloride, thimerosal.
Medium: porcine (pig) pancreatic hydrolysate of casein.

Hepatitis B
SmithKline Beecham Pharmaceuticals 800-633-8900 x5231

Produced using aluminum hydroxide, thimerosal.
Medium: yeast (possibly 5% residual).

IPOL
Inactivated Polio Vaccine
Connaught Laboratories 1-800-822-2463

Produced using 3 types of polio virus, formaldehyde, phenoxyethanol
(antifreeze), neomycin, streptomycin, polymixin B.
Medium: VERO cells, a continuous line of Monkey kidney cells.

MMR
Measles Mumps Rubella Live Viruse Vaccine
Merck & Co., Inc. 800-934-5556

Produced using sorbitol, neomycin, hydrolized gelatin.
Mediums: M&M - chick embryo.
Rubella - Human diploid cells (originating from human aborted fetal tissue).

Orimune
Poliovirus Vaccine Live Oral Trivalent
Lederle Laboratories 800-934-5556

Produced using 3 types of attenuated polioviruses, streptomycin, neomycin, calf serum, sorbitol.
Medium: monkey kidney cell culture

Varivax
Varicella Virus Vaccine Live (chicken pox Vaccine)
Merck & Co., Inc. 800-672-6372

Produced using sucrose, phosphate, glutamate, processed gelatin medium: Human Diploid Cells (originating from human aborted fetal tissue)

Vaccines Grown In Aborted Fetal Cell Cultures

Chickenpox, VARIVAX: Merck
Hepatitis A, VAQTA: Merck
Polio (oral), Poliovac, Canada: Connaught
Polio, IMOVAX: Connaught
Rabies, Imovax: Pasteur Merieux
Rubella, MERUVAX: Merck

Vaccines With Live Virus

Chickenpox, VARIVAX: Merck
Measles, ATTENUVAX: Merck
Measles and Mumps, M-M-Vax: Merck
Measles, Mumps and Rubella, M-M-RII: Merck
Measles and Rubella, M-R-VaxII: Merck
Mumps, MUMPSVAX: Merck
Rubella, MERUVAX: Merck
Rubella and Mumps: BIAVAX

Vaccines - Genetically-Engineered

Hepatitis B: Merck

Hepatitis B: SmithKline Beecham
Lyme, LYMERIX: SmithKline Beecham
RSV, Synapis: MedIMMUNE (vaccine or preventive treatment?)

Vaccines With Animal And Cattle Parts

Chickenpox, VARIVAX -- fetal bovine serum: Merck
Diphtheria, Tetanus, acellular Pertussis, Acel-Immune -- beef heart infusion: Lederle
Infanrix -- bovine extract: SmithKline Beecham
Flu, FLUSHIELD -- chick embryos: Wyeth: Fluzone -- chicken embryos: Connaught
Measles, ATTENUVAX -- hydrolyzed gelatin: Merck
Measles, Mumps and Rubella, M-M-RII -- hydrolyzed gelatin: Merck
Mumps, MuMPSVAX -- hydrolyzed gelatin: Merck
Polio, IPOL -- calf serum, monkey kidney cells: Pasteur Merieux
Polio (oral), ORIMUNE -- kidney cells, calf serum: Lederle
Rubella, MERUVAX -- hydrolyzed gelatin: Merck
Rubella and Mumps, BIAVAX -- hydrolyzed gelatin: Merck

Vaccines Using Cattle Material - (blood, fetal calf serum, meat broth--from countries U.S. government states have a RISK OF MAD COW DISEASES.)

Anthrax: *BioPort DPT
Certiva, Anthrax: *BioPort DPT
Certiva, , diphtheria, pertussis, tetanus: North American/Baxter International
DPT: Infanrix, diphtheria, pertussis, tetanus: GlaxoSmithKline Beecham
Hep A: *Havrix, hepatitis A: GlaxoSmithKline Beecham
Hib *ActHIB, haemophilus influenza Type B: Aventis Pasteur
Hib: *OmniHIB: haemophilus influenza Type B: GlaxoSmithKline Beecham
Pneumonia, *PNU-IMUNE 23: Lederle/American Home Products
Polio IPOL: Aventis Pasteur

*** Cattle parts are NOT LISTED in vaccine package insert**

Illinois Vaccine Awareness Coalition (IVAC)
